**MSD Notice of Construction Completion
MOCKINGBIRD LANE SEWER REPLACEMENT
In Springfield Township, Hamilton County, Ohio**

Springfield Township, February 22, 2006 – Under a contract managed by the Metropolitan Sewer District of Greater Cincinnati (MSD), TT Maintenance Construction, substantially completed the Mockingbird Lane Sewer Replacement project on February 17, 2006.

The project replaced approximately 200 feet of existing twelve-inch sanitary sewer and a service connection. A closed-circuit television inspection of the original sanitary sewer showed it to be in poor condition which resulted in ponding and flow blockages. The construction cost for the project was \$55,000.

This project is part of MSD's ongoing Capital Improvement Program (CIP), which is focused on continually updating and improving the operation of MSD's wastewater collection and treatment systems.

Every day, the Metropolitan Sewer District of Greater Cincinnati (MSD) manages the effective collection and treatment of more than 200 million gallons of wastewater and actively maintains 3,000 miles of sanitary and combined sewers that run through the 49 municipalities and townships of Hamilton County. Owned by Hamilton County and operated by the City of Cincinnati, MSD is committed to continually maintaining and improving its wastewater collection and treatment systems for the betterment of both public and environmental health.
